## Conditions of Membership

These conditions relate to the operation and function of the Charles Sturt University Bathurst gym. Failure to comply with these conditions may result in termination of membership.

### Conduct

- Members must swipe their access card every time when entering the gym.
- Members must always bring a towel to the gym.
- Members must wipe down the equipment with either a towel or a disinfectant wipe provided.
- Enclosed footwear and shirts or singlets must be worn at all times in the gym.
- No food or drink (excluding bottled water or sports drink) is to be consumed inside the gym.
- Alcohol and intoxication are not permitted inside the gym.
- When using the gym, all emergency exits and fire extinguishers must remain unrestricted.
- All incidents or safety hazards or any other issue with the gym must be reported to the gym supervisor on duty.
- Members must seek instruction on how to use equipment correctly prior to use.
- Members must all equipment is to be returned to where it came from and the area must be left in a clean state.
- Unauthorised entry is not permitted. Unauthorised entry includes but is not limited to: sharing passes, allowing a non-member unpaid entry, entry by emergency exits, and use of invalid or expired membership cards.
- Members must at all times respect other Charles Sturt University gym members, guests and staff and must not engage in conduct that disturbs, detracts or impairs any other person's experience. Inappropriate behaviour including but not limited to offensive language, threatening, intimidating or violent behaviour or harassment of any form, or the use of illegal or performance enhancing drugs is prohibited. Offenders will be asked to leave the gym and membership may be terminated. This will be at the sole discretion of Charles Sturt University.

- Abuse of, or damage to any property or equipment will not be tolerated and offenders may be asked to leave the gym and membership may be terminated. This will be at the sole discretion of Charles Sturt University.
- Members must pay for any loss or damage to equipment at the gym caused by them.
- Any member caught stealing will have their membership terminated without refund, will not be allowed back to the gym, and will be referred to the appropriate authorities.
- Members under the age of 16 must be accompanied by an adult at all times unless otherwise agreed with gym staff.
- If members wish to borrow equipment, it must be logged by the gym supervisor on duty and returned after the agreed upon time.

### **Risk and liability**

- Charles Sturt University accepts no responsibility for lost or stolen belongings.
- Each member acknowledges and accepts the inherent risks in using the gym (including but not limited to using fitness equipment and undertaking any exercise program or activity). These risks include personal injury or death. Personal injury includes but is not limited to broken bones, soft tissue injuries, joint injuries, concussion, or permanent disability. Each member acknowledges these risks arise not just from their own actions but also the actions, omissions or negligence of others.
- Each member represents to the best of their knowledge they have no conditions or injuries which may be aggravated by their use of the gym that may affect their ability to participate safely; and that they are capable of meeting required experience and ability levels relevant to their use of any equipment, or attendance at any program or activity at the gym.
- Each member agrees they are using the gym at their own risk and are responsible for their own health and safety.
- Each member indemnifies and releases Charles Sturt University from any claim arising as a result of the member's use of the gym or any advice given by Charles Sturt University gym staff.

### **Cooling Off**

Members may cancel their membership any time before close of business on the seventh (7th) day following the date of this application. For security and identification purposes, cancellation must be completed in-person at the gym. If a membership is cancelled, Charles Sturt University will refund to the member all fees already paid.

### **Privacy statement**

The personal information provided in this application is managed in accordance with the *Privacy and Personal Information Protection Act* 1998 and Charles Sturt University's [Privacy Management Plan](#). The information will be used by authorised staff for the purpose for which it was collected and will be protected against unauthorised access and use.

### **Emergency**

In the event of an emergency members agree that Charles Sturt University staff may pass on the member's personal information contained in this application to the emergency service staff.

Charles Sturt  
University

**Declaration**

I understand and accept the conditions of this gym membership application.

# ADULT PRE-EXERCISE SCREENING SYSTEM (APSS)

This screening tool is part of the Adult Pre-Exercise Screening System (APSS) that also includes guidelines (see User Guide) on how to use the information collected and to address the aims of each stage. No warranty of safety should result from its use. The screening system in no way guarantees against injury or death. No responsibility or liability whatsoever can be accepted by Exercise & Sport Science Australia, Fitness Australia, Sports Medicine Australia or Exercise is Medicine for any loss, damage, or injury that may arise from any person acting on any statement or information contained in this system.

Full Name: \_\_\_\_\_

Date of Birth: \_\_\_\_\_ Male: \_\_\_\_\_ Female: \_\_\_\_\_ Other: \_\_\_\_\_

## STAGE 1 (COMPULSORY)

**AIM:** To identify individuals with known disease, and/or signs or symptoms of disease, who may be at a higher risk of an adverse event due to exercise. An adverse event refers to an unexpected event that occurs as a consequence of an exercise session, resulting in ill health, physical harm or death to an individual.

This stage may be self-administered and self-evaluated by the client. Please complete the questions below and refer to the figures on page 2. Should you have any questions about the screening form please contact your exercise professional for clarification.

Please tick your response

	YES	NO
1. Has your medical practitioner ever told you that you have a heart condition or have you ever suffered a stroke?	<input type="checkbox"/>	<input type="checkbox"/>
2. Do you ever experience unexplained pains or discomfort in your chest at rest or during physical activity/exercise?	<input type="checkbox"/>	<input type="checkbox"/>
3. Do you ever feel faint, dizzy or lose balance during physical activity/exercise?	<input type="checkbox"/>	<input type="checkbox"/>
4. Have you had an asthma attack requiring immediate medical attention at any time over the last 12 months?	<input type="checkbox"/>	<input type="checkbox"/>
5. If you have diabetes (type 1 or 2) have you had trouble controlling your blood sugar (glucose) in the last 3 months?	<input type="checkbox"/>	<input type="checkbox"/>
6. Do you have any other conditions that may require special consideration for you to exercise?	<input type="checkbox"/>	<input type="checkbox"/>

**IF YOU ANSWERED 'YES'** to any of the 6 questions, please seek guidance from an appropriate allied health professional or medical practitioner prior to undertaking exercise.

**IF YOU ANSWERED 'NO'** to all of the 6 questions, please proceed to question 7 and calculate your typical weighted physical activity/exercise per week.

7. Describe your current physical activity/exercise levels in a typical week by stating the frequency and duration at the different intensities. For intensity guidelines consult figure 2.				<b>Weighted physical activity/exercise per week</b>	
<b>Intensity</b>	<b>Light</b>	<b>Moderate</b>	<b>Vigorous/High</b>		Total minutes = (minutes of light + moderate) + (2 x minutes of vigorous/high)
<b>Frequency</b> (number of sessions per week)	_____	_____	_____		
<b>Duration</b> (total minutes per week)	_____	_____	_____		
				<b>TOTAL = _____ minutes per week</b>	
<ul style="list-style-type: none"> <li>• If your total is less than 150 minutes per week then light to moderate intensity exercise is recommended. Increase your volume and intensity slowly.</li> <li>• If your total is more than or equal to 150 minutes per week then continue with your current physical activity/exercise intensity levels.</li> <li>• It is advised that you discuss any progression (volume, intensity, duration, modality) with an exercise professional to optimise your results.</li> </ul>					

I believe that to the best of my knowledge, all of the information I have supplied within this screening tool is correct.

Client signature: \_\_\_\_\_ Date: \_\_\_\_\_

**FIGURE 1: Stage 1 Screening Steps**

**FIGURE 2: Exercise Intensity Guidelines**

INTENSITY CATEGORY	HEART RATE MEASURES	PERCEIVED EXERTION MEASURES	DESCRIPTIVE MEASURES
<b>LIGHT</b>	40 to <55% HRmax*	<b>VERY LIGHT TO LIGHT RPE# 1-2</b>	<ul style="list-style-type: none"> <li>An aerobic activity that does not cause a noticeable change in breathing rate</li> <li>An intensity that can be sustained for at least 60 minutes</li> </ul>
<b>MODERATE</b>	55 to <70% HRmax*	<b>MODERATE TO SOMEWHAT HARD RPE# 3-4</b>	<ul style="list-style-type: none"> <li>An aerobic activity that is able to be conducted whilst maintaining a conversation uninterrupted</li> <li>An intensity that may last between 30 and 60 minutes</li> </ul>
<b>VIGOROUS</b>	70 to <90% HRmax*	<b>HARD RPE# 5-6</b>	<ul style="list-style-type: none"> <li>An aerobic activity in which a conversation generally cannot be maintained uninterrupted</li> <li>An intensity that may last up to 30 minutes</li> </ul>
<b>HIGH</b>	≥ 90% HRmax*	<b>VERY HARD RPE# 7</b>	<ul style="list-style-type: none"> <li>An aerobic activity in which it is difficult to talk at all</li> <li>An intensity that generally cannot be sustained for longer than about 10 minutes</li> </ul>

\* HRmax = estimated heart rate maximum. Calculated by subtracting age in years from 220 (e.g. for a 50 year old person = 220 - 50 = 170 beats per minute).

# = Borg's Rating of Perceived Exertion (RPE) scale, category scale 0-10.

Modified from Norton K, L. Norton & D. Sadgrove. (2010). Position statement on physical activity and exercise intensity terminology. J Sci Med Sport 13, 496-502.

# STAGE 2 (RECOMMENDED)

**AIM:** This stage is to be completed with an exercise professional to determine appropriate exercise prescription based on established risk factors.

CLIENT DETAILS	GUIDELINES FOR ASSESSING RISK
<p>8. Demographics</p> <p>Age: _____</p> <p>Male      Female      Other</p>	<p>Risk of an adverse event increases with age, particularly males <math>\geq 45</math> yr and females <math>\geq 55</math> yr.</p>
<p>9. Family history of heart disease (e.g. stroke, heart attack)?</p> <p>Relationship (e.g. father)      Age at heart disease event</p> <p>_____</p> <p>_____</p> <p>_____</p>	<p>A family history of heart disease refers to an event that occurs in relatives including parents, grandparents, uncles and/or aunts before the age of 55 years.</p>
<p>10. Do you smoke cigarettes on a daily or weekly basis or have you quit smoking in the last 6 months?</p> <p>Yes      No</p> <p>If currently smoking, how many per day or week?</p> <p>_____</p>	<p>Smoking, even on a weekly basis, substantially increases risk for premature death and disability. The negative effects are still present up to at least 6 months post quitting.</p>
<p>11. Body composition</p> <p>Weight (kg) _____ Height (cm) _____</p> <p>Body Mass Index (kg/m<sup>2</sup>) _____</p> <p>Waist circumference (cm) _____</p>	<p>Any of the below increases the risk of chronic diseases:</p> <p>BMI <math>\geq 30</math> kg/m<sup>2</sup></p> <p>Waist &gt; 94 cm male or &gt; 80 cm female</p>
<p>12. Have you been told that you have high blood pressure?</p> <p>Yes      No</p> <p>If known, systolic/diastolic (mmHg)</p> <p>_____</p> <p>Are you taking any medication for this condition?</p> <p>Yes      No</p> <p>If yes, provide details</p> <p>_____</p>	<p>Either of the below increases the risk of heart disease:</p> <p>Systolic blood pressure <math>\geq 140</math> mmHg</p> <p>Diastolic blood pressure <math>\geq 90</math> mmHg</p>
<p>13. Have you been told that you have high cholesterol/ blood lipids?</p> <p>Yes      No</p> <p>If known:</p> <p>Total cholesterol (mmol/L) _____</p> <p>HDL (mmol/L) _____</p> <p>LDL (mmol/L) _____</p> <p>Triglycerides (mmol/L) _____</p> <p>Are you taking any medication for this condition?</p> <p>Yes      No</p> <p>If yes, provide details _____</p>	<p>Any of the below increases the risk of heart disease:</p> <p>Total cholesterol <math>\geq 5.2</math> mmol/L</p> <p>HDL &lt; 1.0 mmol/L</p> <p>LDL <math>\geq 3.4</math> mmol/L</p> <p>Triglycerides <math>\geq 1.7</math> mmol/L</p>

CLIENT DETAILS	GUIDELINES FOR ASSESSING RISK
<p>14. Have you been told that you have high blood sugar (glucose)?</p> <p>Yes      No</p> <p>If known: Fasting blood glucose (mmol/L) _____</p> <p>Are you taking any medication for this condition?</p> <p>Yes      No</p> <p>If yes, provide details</p> <p>_____</p>	<p>Fasting blood sugar (glucose) <math>\geq 5.5</math> mmol/L increases the risk of diabetes.</p>
<p>15. Are you currently taking prescribed medication(s) for any condition(s)? These are additional to those already provided.</p> <p>Yes      No</p> <p>If yes, what are the medical conditions?</p> <p>_____</p>	<p>Taking medication indicates a medically diagnosed problem. Judgment is required when taking medication information into account for determining appropriate exercise prescription because it is common for clients to list 'medications' that include contraceptive pills, vitamin supplements and other non-pharmaceutical tablets. Exercise professionals are not expected to have an exhaustive understanding of medications. Therefore, it may be important to use common language to describe what medical conditions the drugs are prescribed for.</p>
<p>16. Have you spent time in hospital (including day admission) for any condition/illness/injury during the last 12 months?</p> <p>Yes      No</p> <p>If yes, provide details</p> <p>_____</p>	<p>There are positive relationships between illness rates and death versus the number and length of hospital admissions in the previous 12 months. This includes admissions for heart disease, lung disease (e.g., Chronic Obstructive Pulmonary Disease (COPD) and asthma), dementia, hip fractures, infectious episodes and inflammatory bowel disease. Admissions are also correlated to 'poor health' status and negative health behaviours such as smoking, alcohol consumption and poor diet patterns.</p>
<p>17. Are you pregnant or have you given birth within the last 12 months?</p> <p>Yes      No</p> <p>If yes, provide details</p> <p>_____</p> <p>_____</p> <p>_____</p>	<p>During pregnancy and after recent childbirth are times to be more cautious with exercise. Appropriate exercise prescription results in improved health to mother and baby. However, joints gradually loosen to prepare for birth and may lead to an increased risk of injury especially in the pelvic joints. Activities involving jumping, frequent changes of direction and excessive stretching should be avoided, as should jerky ballistic movements. Guidelines/fact sheets can be found here: 1) <a href="http://www.exerciseismedicine.com.au">www.exerciseismedicine.com.au</a> 2) <a href="http://www.fitness.org.au/Pre-and-Post-Natal-Exercise-Guidelines">www.fitness.org.au/Pre-and-Post-Natal-Exercise-Guidelines</a></p>
<p>18. Do you have any diagnosed muscle, bone, tendon, ligament or joint problems that you have been told could be made worse by participating in exercise?</p> <p>Yes      No</p> <p>If yes, provide details</p> <p>_____</p> <p>_____</p>	<p>Almost everyone has experienced some level of soreness following unaccustomed exercise or activity but this is not really what this question is designed to identify. Soreness due to unaccustomed activity is not the same as pain in the joint, muscle or bone. Pain is more extreme and may represent an injury, serious inflammatory episode or infection. If it is an acute injury then it is possible that further medical guidance may be required.</p>

**Important Information:** This screening tool is part of the [Adult Pre-Exercise Screening System \('APSS'\)](#) and should be read with the APSS guidelines (see [User Guide](#)) on how to use the information collected and to address the aims of each stage. This does not constitute medical advice. This form, the guidelines and the APSS (together 'the material') is not intended for use to diagnose, treat, cure or prevent any medical conditions, is not intended to be professional advice and is not a substitute for independent health professional advice. Exercise & Sports Science Australia, Fitness Australia, Sports Medicine Australia and Exercise is Medicine (together 'the organisations') do not accept liability for any claims, howsoever described, for loss, damage and/or injury in connection with the use of any of the material, or any reliance on the information therein. While care has been taken to ensure the information contained in the material is accurate at the date of publication, the organisations do not warrant its accuracy. No warranties (including but not limited to warranties as to safety) and no guarantees against injury or death are given by the organisations in connection with the use or reliance on the material. If you intend to take any action or inaction based on this form, the guidelines and/or the APSS, it is recommended that you obtain your own professional advice based on your specific circumstances.
